PROFESSIONAL STATEMENT

Driven, passionate, industrious and self-motivated are words that I would use to describe myself. I am an engineer who is obsessed about quality, efficiency and value. I enjoy problems that stimulate and provides consistent challenges. I enjoy helping others and would not describe myself as someone who is arrogant. Tinkering with new and upcoming technologies are tactic I use to keep myself engaged, intrigued and motivated as a Software Engineer

EXPERIENCE

2018 - Present

National Commerical Bank Of Jamaica

Senior Developer Analyst

Technical Lead for NCB's Consumer Loans team, I deliver solutions for loan and credit card applications, design and build Java microservices with Kubernetes, develop front-end applications with React, perform root cause and resolution analysis, mentor developers, and support enhancements to core banking systems.

2014 - 2018

Epic Technologies

Senior Software Developer

I was technical lead for the company's Human Resource Management and their insurance product's data migration tools. My responsibilities were to design and build web and desktop applications with Laravel/PHP and 4D, mentor junior devs and provide technical support for our payroll software product.

2010 - 2014

Epic Technologies

Part Time Software Developer

My responsibilities were to resolve bugs in the companies Insurance product and extend its feature.

2013- 2014

Alteroo Consulting Group

Web Developer

My responsibilities were to customize Plome CMS to the specification and design of our clients

EDUCATION

2011- 2014

Bsc. Computer Science

Univeristy of The West Indies, Jamaica

2009 - 2011

CAPE

Portmore Community College, Jamaica
